

Innovative Solutions for Drug Discovery and Life Sciences Research

Unleash your brilliance

Advancing cell and protein analysis technologies for your landmark scientific achievements

Molecular Devices is a leading provider of high-performance bioanalytical measurement solutions for life science research, pharmaceutical development, and biotherapeutic discovery with over 130,000 instrument placements in laboratories around the world that have fueled over 25,000 peer-reviewed publications. Our leading-edge products enable you to improve productivity and effectiveness, ultimately accelerating research and the discovery of new therapeutics.

Multi-Mode Detection Systems

We offer a versatile range of multi-mode readers with a variety of product configurations to allow you to meet your research application needs. With up to eight different detection modes and field upgradability, you now have the flexibility to expand your capabilities at any time.

SpectraMax® i3x

Three-mode plate reader with user upgradeable application modules including TRF, Injectors and Western Blot. Optional MiniMax 300 Imaging Cytometer for cellular imaging capabilities.

SpectraMax Paradigm

High-throughput, user-upgradeable multi-mode microplate reader platform that enables new detection mode capability in under two minutes.

SpectraMax M Series

Upgradeable platform with tunable absorbance, fluorescence, luminescence; TRF, triple mode cuvette port, kinetics, spectral and well scanning, AutoPMT and PathCheck™ Technology.

FlexStation® 3

Tunable absorbance, fluorescence, FRET, TRF, FP, TR-FRET, HTRF, luminescence with automated fluid transfer for endpoint, flex and fast kinetics.

FilterMax F3 & F5

Filter-based multi-mode microplate readers that provide both affordability and unmatched assay performance.

Absorbance Readers

Our line of absorbance readers, including instruments featuring patented technologies such as PathCheck® Pathlength Measurement technology and tunable monochromators, provide you with more flexibility, sensitivity, and ease-of-use for the broadest range of assays.

SpectraMax Plus³⁸⁴

UV-visible absorbance microplate reader with ultrafast, full spectral range detection for cuvettes, 96- and 384-well microplates.

SpectraMax 340PC³⁸⁴ / SpectraMax 190

Versatile visible absorbance reader for 96- and 384-well microplate formats. SpectraMax 190 adds UV absorbance detection.

VersaMax

Bridging the gap between the affordability of filter-based readers and the flexibility of monochromator-based systems for 96-well plate formats.

EMax Plus

Robust, high-value microplate reader designed to deliver research-grade results to any laboratory. Simple to set up and features pre-defined protocols.

SpectraMax QuickDrop Micro-Volume Spectrophotometer

Rapid, accurate DNA, RNA, and protein quantitation in a one-touch, full-spectrum micro-volume absorbance reader.

Fluorescence Readers

Analyze ELISAs, protein and nucleic acid quantitation, reporter gene, cell viability and proliferation, and cytotoxicity assays all without the use of filters.

Gemini XPS

Enables top reading of microplates over a greater range of fluorescence intensities—all without the use of filters.

Gemini EM

Enables top and bottom reading of microplates without the use of filters. Tunable to 250-850 nm excitation, 360-850 nm emission.

Luminescence Readers

High sensitivity and high throughput glow and flash luminescence detection in an upgradeable platform.

SpectraMax L

Upgradeable platform available with one or two luminescence detectors, enabling affordable higher throughput configurations.

Microplate Washers

Robust and reliable microplate washers are an essential component of today's research laboratories. We offer a range of washers to meet your needs including strip washers and full plate washers.

MultiWash+

The compact, quiet, user-friendly MultiWash+ Microplate Washer includes 20 pre-set protocols, works with both 96- and 384-well plates and comes with 4 different wash/rinse bottles for out-of-the-box use. It's simply a great fit for any lab.

AquaMax®

The 4-in-1 AquaMax line of self-contained, automation-capable washer systems are easily configurable to meet assay needs.

Software Solutions

Our suite of software packages delivers the most comprehensive and feature-rich solutions for every data analysis need. From ready-to-run algorithms to high-content informatics, our software solutions provide you with the tools you need to evaluate your data.

SoftMax® Pro

Industry-leading SoftMax Pro Software is used by over 100,000 users worldwide, delivering the most comprehensive portfolio of ready-to-run protocols, analysis algorithms and FDA 21 CFR Part 11 compliance tools.

GenePix Pro

GenePix Pro Software is the industry standard in microarray image analysis because of its unique combination of imaging and analysis tools, visualizations, automation capabilities, performance and ease-of-use.

Handlers and Accessories

Expand the capabilities of your Molecular Devices platform through the addition of a wide array of handlers and accessories. From an automated microplate handling system to a low volume microplate, our handlers and accessories help you achieve the results you want.

StakMax Microplate Handling System

An integrated microplate stacker that provides benchtop automation for batches of up to 50 microplates in a small footprint.

SpectraDrop Micro-Volume Microplate

Specially-designed, high throughput solution for low volume DNA and protein measurement assures uniform and reproducible analysis.

SpectraTest Validation Plates

Comprehensive tools for verifying Molecular Devices absorbance, fluorescence, and luminescence microplate readers are performing to manufacturing specifications.

Microarray Scanning Systems

Our systems can handle any slide-based microarray study, from small one- or two-fluorophore applications to multiple-fluorophore high-throughput projects requiring automated sample handling and secure enterprise-wide data management and analysis. All GenePix scanners include one license of GenePix Pro Image Acquisition and Analysis Software, the benchmark tool for the acquisition and analysis of microarray images.

GenePix 4300/4400

Coupled with GenePix Pro Microarray Image Analysis Software and Acuity Microarray Informatics Software, these systems provide powerful, flexible, and easy-to-use solutions for acquisition and analysis.

GenePix 4100A

Built on our award-winning optical, electronic and software design, this sequential scanner has all the quality in a price range and bench-top footprint that makes it ideal for individual lab use.

GenePix 4000B

This scanner is a benchmark for quality, reliability and ease-of-use in microarray scanning technology.

Assay Kits

We offer easy-to-use, robust assay kits for life science research, drug discovery & development, and bioassays. All assay kits are optimized for use on Molecular Devices systems.

ScanLater Western Blot

Substrate-free immunoblot assay for extended signal stability.

GPCR Assays

Cell-based assays including FLIPR Calcium assay kits and CatchPoint cAMP and cGMP reagents optimized for sensitivity.

EarlyTox Kits

Cardiotoxicity and Cell Integrity kits allow you to measure cytotoxicity and distinguish live cells.

FLIPR Membrane Potential

Mix-and-read simplicity to rapidly screen ion channel targets.

Enzymes

Homogeneous assays measure kinases, phosphatases, and phosphodiesterases.

Transporters

Live-cell kinetic assays measure fatty acid and neurotransmitter uptake.

SPARCL EIA Kit

Homogeneous no-wash assay for protein quantitation.

Contaminants

Assays measure proteins, peptides, microorganisms, and single-stranded DNA.
